*Approved*

AN ISO 9001 : 2008 COMPANY

### Technical Specification:

- All materials with corrosion protected
- Hydro static for leakage detection
- Strong galvanize tank
- Advanced technology in tank welded
- Robust stand design
- Electric back-up heaters with thermostat will be provided on customer's demand.
- 50-60mm. PUF Insulation
- Pure polyester powder coating finish tank.
- Suitable for any types of water

### Features (Characteristic)

- Multi layer vacuum tube
- Low maintenance
- Quick heat generation
- Convenient: Double guarantee to supply hot water during 24H in all weather
- Commercial systems customized for special needs from 500 LPD to any capacity
- Environment friendly
- Ultrasonic welded - selective coated 99.9% copper-copper solar. Collectors for very service life
- Available in a wide range of specifications
- Collectors Manufactured by an ISO 9001 & 14000 Certified Company

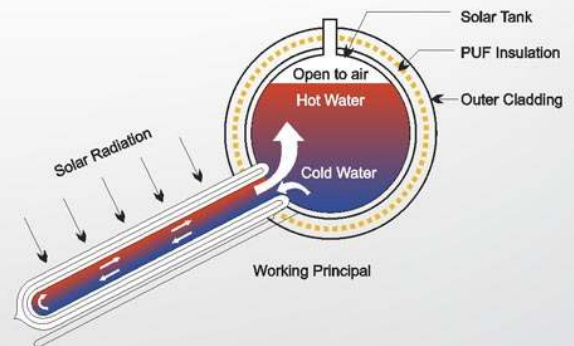

### Application

- Flats, Bungalows and Apartments and Community Centers
- Airport, Railways, Cafeteria
- Commercial & Industrials
- Swimming Pool
- Schools, Colleges, Institutional and Hostels
- Hotel, Restaurant and Food Point
- Pharmaceuticals, Dairy Plant, Boiler Feed

### Main Component of Solar Water Heater

- Solar Collector to collect solar energy
- Insulated tank for store hot water
- Supporting stand
- Connecting pipes and instrumentation, etc
